Care Management

Every Home Care Package, including those being self-managed, will require some level of care management by our care coordinators.

Care Management is an important service that includes coordinating care and services that will help you achieve the goals you have set in your care plan.

Fully managed by Country Health Connect

When fully managed by our team, care management covers establishing and reviewing your Home Care Agreement and Care Plan, coordinating service provision by trained, supervised staff, responding to lifestyle/cultural preferences, liaising with you, your support network and identifying and addressing safety risks. Care management charges align to staff roles/skills and increase with complexity of care.

Approximate care management time per HCP level is indicated in the schedule below.

Self-managed Care Management

When self-managed, a fee is charged for activities our team is required, by legislation, to undertake (establishment/review of the Home Care Agreement and Care Plan, supervision of staff).

Approximate care management time is indicated in the schedule.

Two levels of Care Management		Level 1	Level 2	Level 3	Level 4
